

Installation Instructions

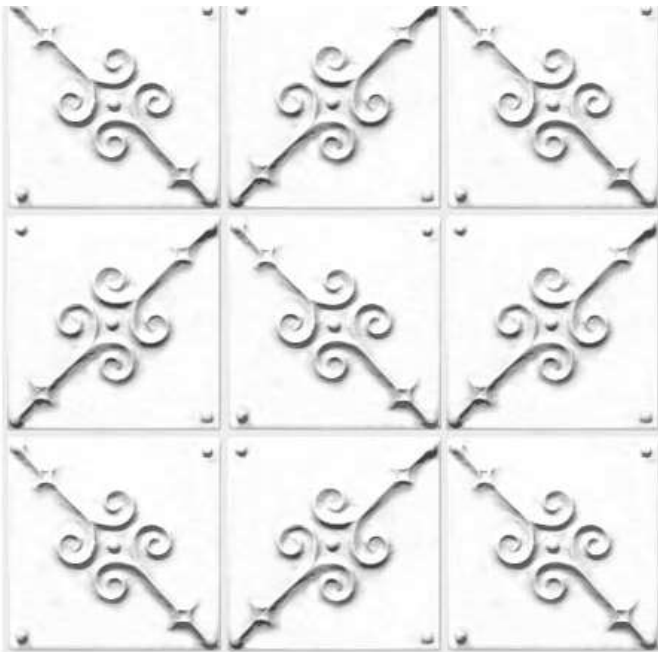

Substrate & mortar

Prepare substrate and mortar in accordance with guidelines of the Tile Council of America (TCNA).

Usage

Talisman Swan's Trumpet 6x6" tiles and trims are suitable for wall installations. Talisman Field tiles are suitable for walls and light use residential floors. All Talisman Tiles are suitable for wet areas, including showers and steam showers.

Recommended arrangement

Lay Out First

Lay out the entire installation before setting any tiles. Make sure the glaze range is evenly distributed.

Spacing

Talisman tiles are made by hand and there is variation in size and shape. The grout lines will not be uniform. We recommend keeping the grout spaces between 1/8 and 3/16 inch.

Grout

Use sanded grout that is close in color to the color of the tiles.

Grout Clean Up

Clean all grout off the tiles before the grout dries. Use a damp sponge, followed by a damp terry cloth towel. **Be sure to remove the grout from the small recesses of the patterns before it dries.**

Cleaning & Maintenance

Clean with warm water and pH-neutral cleanser. Do not use acids, alkalis, or other harsh chemicals for regular cleaning. A mild acid or alkali cleanser may be used for spot cleaning. Make sure to test first on a small, unobtrusive area to ensure desired results.
